

SAMANTHA POLIANA BATISTI FERNANDES

Data Analytics Senior Manager | Data Strategy | AI & Automation | People & Partner Analytics | Product-Minded Leader

Carapicuiaba, SP | (11) 96835-9319 | samantha.pbatisti@gmail.com | linkedin.com/in/samantha-batisti | github.com/Sam-Batisti

PROFESSIONAL SUMMARY

Senior Data and Analytics leader with 13+ years of experience bridging technical execution and business strategy across global, fast-paced environments. Proven track record of leading analytics teams, designing robust data models, and delivering insights that directly optimize strategic objectives. Strong background acting as a Data Product Manager, translating complex business requirements into actionable data products, ensuring high standards for data governance, documentation, and quality for non-technical stakeholders. Experienced in partnering with department leaders to define KPIs, overseeing end-to-end delivery of localized data pipelines, and enabling data-driven cultures across HR, Operations, and Partner-facing domains. Fluent in collaborating with cross-functional global teams, combining technical depth in SQL, Python, data modeling, AI agents, and LLMs with people management, process optimization, and stakeholder enablement. Passionate about emerging technologies, inclusive leadership, and building supportive environments where teams thrive.

CORE COMPETENCIES

- Data Strategy and KPI Frameworks
- Data Governance, Documentation and Quality (DAMA)
- SQL and Python (mandatory expertise)
- Data Modeling, ETL/ELT and Analytics Pipelines
- Data Visualization: Power BI, Tableau, Looker
- Data as a Product and Product Management Mindset
- AI Agents and LLM Orchestration (MCP - Model Context Protocol)
- Generative AI Applied to Business Automation
- MCP Servers and REST API Integration
- Supabase, PostgreSQL and GitHub Actions
- People Management and Team Development
- Process Automation and Operational Efficiency
- Cross-functional and Global Stakeholder Management
- Agile Methodologies: Scrum, Kanban
- Agentic Workflows and Tool Orchestration
- AI-augmented Analytics

PROFESSIONAL EXPERIENCE

Founder | AI Data Engineer | AI Agent Developer

LevelInteligencia | Jun 2025 - Present

Founder and responsible for all areas of LevelInteligencia, a consultancy specialized in AI applied to data. Working as AI Data Engineer, building end-to-end solutions that connect Artificial Intelligence to real business data.

- Development of MCP Servers (Model Context Protocol) for integrating LLMs with live data sources
- Creation of autonomous AI Agents with serverless orchestration via GitHub Actions
- Relational database modeling and architecture with Supabase (PostgreSQL) and real-time integration
- Operational dashboards with real-time data via REST API integration
- Advanced data analysis: ABC Curve, inventory management, customer intelligence
- Data engineering with Python, ETL/ELT and pipeline automation
- Application of Generative AI and LLMs for report automation, insights and decision-making

HR Project and Analytics Manager | DEI Ambassador LATAM

adidas | Sep 2024 - Nov 2025

- Acted as the data strategy lead for People Analytics initiatives, partnering with senior department leaders to define KPIs aligned with business and talent objectives.
- Designed and governed end-to-end data pipelines integrating multiple sources including SharePoint, Excel, and HR systems, ensuring clean, documented, and business-ready datasets.
- Led a team delivering dashboards and localized data products used by HR and business leaders across LATAM.
- Served as the primary technical point of contact between business stakeholders and central/global data teams, translating complex data requirements into actionable insights.
- Automated manual reporting workflows, reducing analysis and delivery time by 40% and improving team efficiency.
- Defined and implemented data governance standards, data dictionaries, and KPI documentation.
- Led machine learning initiatives to prioritize regional actions and optimize decision-making.
- Drove strategic DEI analytics, creating visibility on representation and inclusion metrics for executives.

Key Results:

- **40% reduction in reporting and analysis time through automation.**
- **Enabled data-driven decisions in previously low-visibility HR and diversity areas.**
- **Increased Black representation in corporate offices from 3% to 14% through data-supported affirmative programs.**

Data and Analytics Consultant (Freelance)

Locar | May 2024 - Aug 2024

- Partnered with leadership to define strategic KPIs and analytics priorities, bridging the gap between technical execution and business strategy.
- Assessed data quality and governance across HR systems and databases.
- Built end-to-end analytics solutions using SQL, Python, and Power BI to support executive decision-making.
- Delivered predictive analyses for attrition and workforce planning.

Key Results:

- **12% reduction in employee turnover.**
- **Approximately 34 hours per week saved through reporting automation.**

Data and Analytics Manager | Data Consulting

Foundever | Jun 2022 - Nov 2023

- Led analytics teams delivering BI and advanced analytics solutions for large datasets.
- Defined data strategy, pipelines, and data models, syncing with central teams to ensure local solutions aligned with enterprise global data architecture.
- Acted as Data Product Manager, prioritizing analytics initiatives based on business impact and evaluating priorities to efficiently balance resources.
- Translated complex analyses into clear executive insights.
- Ensured documentation, data quality, and stakeholder adoption of data products.

Key Results:

- **BRL 79,900 saved through Data Mesh initiatives.**
- **2,340+ hours saved per quarter via automation.**
- **BRL 250,000 saved through predictive attrition models.**

Analytics Manager

Foundever | Sep 2021 - Jun 2022

- Managed multidisciplinary analytics teams supporting HR, Operations, Logistics, and Quality.
- Integrated data from multiple business domains to support strategic decisions and cross-functional collaboration.
- Optimized analytics processes and reporting pipelines.

Key Results:

- **15% reduction in reporting time.**
- **BRL 113,000 recovered in logistics costs.**
- **90% improvement in continuous improvement project execution.**

Product Owner

Indra Company | Mar 2017 - May 2020

- Owned data and analytics products from backlog to delivery, acting as Product Manager for the team.
- Defined functional requirements, data needs, and success metrics.
- Led development of analytics-enabled quality monitoring platforms.

Key Results:

- **Supported 1M+ call recordings.**
- **20% increase in operational efficiency.**
- **50% reduction in reporting time.**
